The 6th China International Water Business Summit

Event Vision:

Co-organized by Department of Water Resources Management of the Ministry of Water Resources of the People's Republic of China and Chinese Hydraulic Engineering Society while with the support of many international and local authoritative institutions in 2006, China International Water Business Summit has been successfully held along with prestigious Water Expo China for five consecutive years. This year, in accordance with 'Central First Document', the importance of hydraulic engineering construction has been greatly highlighted in terms of economic, ecological and national safety, with the first central document paying great attention to the reform and development of hydraulic engineering construction since the establishment of New China. Central First Document has formulated and introduced a series of new policies concerning accelerating the reform and development of hydraulic engineering especially in highlighting hydraulic investment, management and reform. The introduction of Central First Document has provided important strategic opportunities for the evolvement of hydraulic engineering, for example, the case of annual investment of 400 billion and 4 trillion in one decade will offer the most direct, effective and largest market space for international and local water corporations. In this case, focusing on this keynote, 6th China International Water Business Summit will be officially held with the purpose of reviewing the past while looking into the opportunities arising from market insights, PPP project practice, financing & investment and technological innovation in waste water treatment, desalination, water reusing. In this case, a grand event covering over 500 industrial elites call for your attendance.

Don't miss half-day visit to Water Expo China to have unique on-site experience

Join the most authoritative and splendid event to:

Learn the most policy guideline and sophisticated experience from government institutions, associations, key industrial companies

Network with over 500 industrial elites to establish and consolidate business relationship

Enjoy two-day fruitful experience including exhibition visit, one-one meeting, VIP meeting in addition to forum

Showcase top product and service in the most ideal way in terms of tailor-made sponsorship packages offered

Experience the advanced products and cutting-edged technology showcased by top service providers

Share practical views and experience with distinguished guests on market insights, business practice, investment & financing opportunities and technological innovation

Key themes to be discussed:

- Latest industrial policy to be illustrated
- Highlighting market insights and practical corporate strategies
- Elaborating on practice and experience on PPP project
- Influence of water pricing on industrial evolvement
- Opportunities & risks arising from financing & investment practice
- Certain legal, tax, human resource issues concerning water industry
- Case study of advanced technology in desalination, waste water treatment, membrane utilization and water reusing practice

Don't miss listening to distinct views and advanced experience!

Main Organizer Introduction:

Ministry of Water Resources (MWR), the Chinese Government Department responsible for water administration, was founded in October, 1949. On February 11, 1958, the 5th Session of the 1st National People's Congress promulgated decisions to consolidate Ministry of Water Resources and Ministry of Electric Power Industry into Ministry of Water Resources and Electric Power. On February 23, 1979, Ministry of Water Resources and Electric Power was separated into two ministries. After the institutional reform in 1982, Ministry of Water Resources and Ministry of Electric Power were combined again as Ministry of Water Resources and Electric Power. In April, 1988, the 1st Session of the 7th National People's Congress passed the institutional reform of the State Council to set up Ministry of Water Resources. Ministry of Water Resources was reorganized on July 22, 1988.

China Decision Makers Consultancy (CDMC) focuses its efforts on creating platforms of opportunities into the China market through synergizing international economic and business structures. We produce and manage high-level conferences and summits which address industry-specific business-to-business topics. Uniquely, all of CDMC's conferences receive ministerial-level official support and sponsorship.

Chinese Hydraulic Engineering Society (CHES) founded originally on April 1931 and rehabilitated and reconstructed in 1957 is an academic organization of Chinese Hydraulic Engineering professionals, affiliated with the China Association for Science and Technology. CHES is a body corporate.

China Environment Service Industry Association is a non-profit organization in environment protection as well as member organization constituted by Beijing Sound Group, Beijing Capital Co., Ltd, Veolia Water, Sino French Water, all of which serve as the top leaders in the industry. Proactively supported by China Federation of Industry and Commerce, the association is always dedicated to contributing to environment service in China.

Beijing Capital Co., Ltd is a listed company controlled by Beijing Capital Group. It has total capital stocks of 2.2 billion shares. Up to December 31st 2005, its total assets and net assets had reached RMB8.373 billion and RMB 4.597 billion respectively. Since its establishment, Beijing Capital Co., Ltd has been committed to improving the market-oriented reform of public infrastructure industry. With the main business scope covering the investments, operation and management of infrastructure, the company aims development direction at China's water market, concentrates on urban water supply and sewage disposal, and dedicates to satisfying people's desire for clean water and clear environment.

Veolia Water has been present in the water market in China since the 1980's, through its subsidiary OTV-Kruger which specializes in water engineering. The Company won its first water management contract in China in 1997, a 20 year contract for the operation and maintenance of a water production facility in the city of Tianjin, including its renovation. The facility supplies 1.85 million inhabitants with water. In 1998, Veolia Water and its Japanese partner, Marubeni, won the first BOT (build-operate-transfer) contract ever awarded to a water services provider in China, with central government approval. This contract, which concerns the city of Chengdu in the west of the country, allowed for the operation and maintenance of a drinking water facility built by Veolia Water Solutions & Technologies for a period of 18 years, serving a population of 2.66 million inhabitants.

Throughout each chapter in its history, ITT has been known for transformative strategies that create value for shareholders, and in 2011 a new chapter has begun. On January 12, ITT Corporation announced it plans to separate into three independent publicly traded companies by the end of the year. Under the plan, ITT Corporation, which will continue to trade on the New York Stock Exchange as a highly engineered industrial products company that supplies solutions in the aerospace, transportation and energy markets, would execute tax-free spinoffs of its water-related businesses and its defense business to shareholders. When this transformation is complete, ITT shareholders will own shares in all three corporations, which are well-positioned to create significant value for shareholders as standalone companies. Each new company will be nicely capitalized, with global capabilities, outstanding operating track records, and world-class people who are dedicated to premier customer service, innovation and delivering value — well into the future.

General Water of China was established jointly by China Energy Conservation And Environmental Protection Group and Shanghai Industrial Holdings Limited in Nov. 2003 with a registered capital of RMB 1.5 billion. By the end of Jun. 2010, the company has possessed 16 wholly-owned subsidiaries or holding subsidiaries and one share-holding subsidiary. The daily capacity is 4,339,000 cubic meters. The total assets is approximately RMB 5.5 billion.

Welcome Letter:

Welcome Letter of 6th China International Water Business Summit

Beijing International Convention Center
October 13th-14th, 2011

As the most significant and influential platform to learn national policy, gauge industrial development trend and explore potential business opportunities in China water industry, 6th China International Water Business Summit will be officially held in Beijing International Convention Center on October 13th-14th, 2011. The international forum is officially hosted by Department of Water Resources Management of the Ministry of Water Resources of the People's Republic of China, Chinese Hydraulic Engineering Society, China Environment Service Industry Association, China Water Resources, China Decision Makers Consultancy and Messe Frankfurt. Meanwhile, Bureau of Comprehensive Development Ministry of Water Resources, Center for Rural Drinking Water Safety, Beijing Capital Co.,Ltd, Veolia Water in China, ITT Corporation and General Water of China serve as co-organizers.

Co-organized by Department of Water Resources Management of the Ministry of Water Resources of the People's Republic of China and Chinese Hydraulic Engineering Society while with the support of many international and local authoritative institutions in 2006, China International Water Business Summit has been successfully held along with prestigious Water Expo China for five consecutive years. This year, in accordance with 'Central First Document', the importance of hydraulic engineering construction has been greatly highlighted in terms of economic, ecological and national safety, with the first central document paying great attention to the reform and development of hydraulic engineering construction since the establishment of New China. Central First Document has formulated and introduced a series of new policies concerning accelerating the reform and development of hydraulic engineering especially in highlighting hydraulic investment, management and reform. The introduction of Central First Document has provided important strategic opportunities for the evolvement of hydraulic engineering, for example, the case of annual investment of 400 billion and 4 trillion in one decade will offer the most direct, effective and largest market space for international and local water corporations. In this case, focusing on this keynote, 6th China International Water Business Summit will be officially held.

This time, the forum will be carried out conforming to the theme of establishing the most strict water resources management system. The main forum is divided into three parts, namely, industrial policy and market insights, opportunities together with risks in finance and investment, technical innovation and case study. Other five affiliated forms follow as sludge disposal and solution, hydraulic engineering informatization technology as well as flood control and hazard mitigation, special forum concerning water resources management across the straits, 2011 China Water Saving and Irrigation Forum, special forum on sludge disposal in China's small and medium-sized cities and villages. Therefore, the forum will be held in the form of keynote speech as well as industrial dialogue to discuss the opportunities and challenges facing China water industry.

We sincerely would like to invite you to join 6th China International Water Business Summit thus contributing to the industrial development.

Secretary General
Chinese Hydraulic Engineering Society

Testimonials:

 'I am quite glad to be here to discuss the development of water industry'
---Hu Siyi, Vice Minister, Ministry of Water Resources, P.R.C

 'This is an ideal platform to highlight national policy and industrial trend'
---Sun Xuetao, Director-General, Department of Water Resources Management, Ministry of Water Resources, P.R.China

 'A wonderful event, I am happy to be here'
---Kerry Olsson, General Manage Water Reform Group, National Water Commission, Australia

 'I learnt a lot from other guest speakers, thanks a lot'
---Pan Wentang, CEO, Beijing Capital Co, Ltd

 'I learnt a lot of enlightening views on China water industry and exchanged ideas with many distinguished guests'
---Erik de Muynck, Senior Executive Vice President Far East, Senior Executive Vice President SUEZ Environment Asia

 'Quite exciting moments, an unrivalled opportunity to meet so many industrial elites'
---Stephan Truchot, Regional Finance Director for Asia Pacific, Veolia Water

 'I expect the event to be more influential and significant in Asia and even in the world'
---Dominique Pajot, Vice President Water Division, Schlumberger

Beijing International Convention Center

The 6th China International Water Business Summit

Event Structure at a Glance:

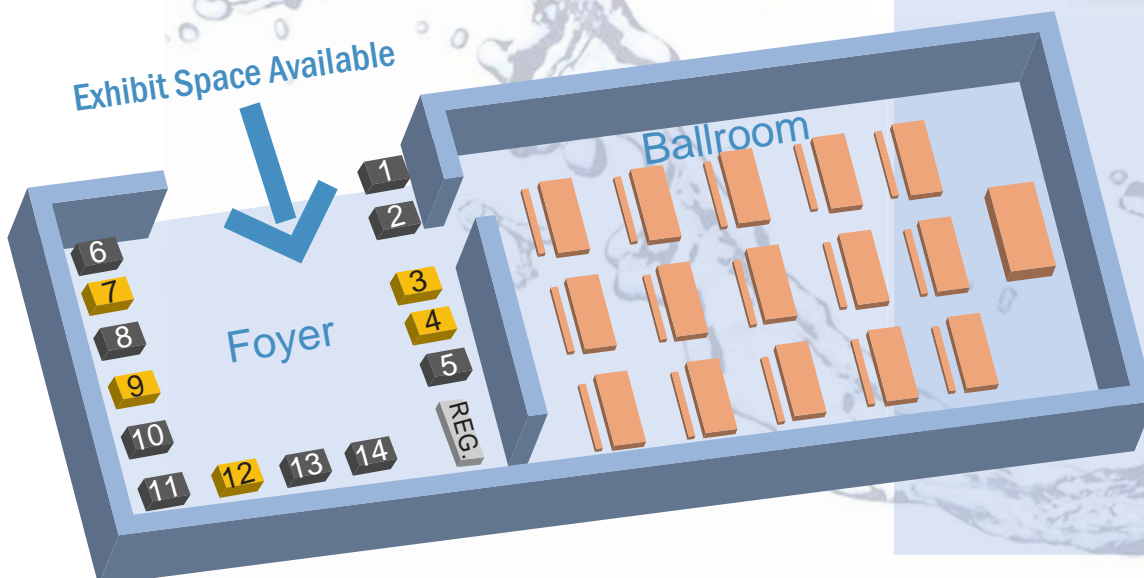

6th China International Water Business Summit

DAY	October 12th, 2011	October 13th, 2011	October 14th, 2011
AM		Visit Water Expo China	Join main forum focusing on financing & investment practice
PM	Arrival in Beijing	Attend the main forum focusing on policy guideline & market insights, one-one meeting offered for further networking	Pay attention to main forum highlighting technology & innovation in waste water treatment, desalination, membrane technology and water reusing

Why should you attend and sponsor:

- The only industrial authoritative platform gathering all market players
- An ideal B-B platform covering over 500 industrial elites and a different experience from traditional exhibition
- Over 30 distinguished speakers to deliver the most enlightening views
- Limited one-one meeting seats to be reserved to meet with your targeted clients
- 30 project showcase booths to be booked just to identify your potential business by means of interacting with decision makers with purchasing power rather than ordinary visitors
- One one-one meeting to do further networking and consolidate business relationship
- Variant tailor-made sponsorship packages including presentation, product showcase, coffee break, workshop etc catering to your specific demands

Only **5** seats to be booked!

Business Summit**

6th China International Water Business Summit

Day 1 Morning, Oct 13th

9: 00 Visit to Water Expo China

12: 30 Luncheon

Day 1 Afternoon, Oct 13th

Policy Guideline & Market Insights

14: 00 Industrial Landscape and Prospect of China Water Industry---Policy Guideline on Industrial Development, Infrastructure Construction and Investment

Ministry of

Water Resources, P.R.C

14: 30 Optimizing Water Resources in China and Enhancing Industrial Development

Department of

Water Resources Management, Ministry of Water Resources, P.R.C

15: 00 Keynote Presentation: Opportunities and Challenges Arising from the Evolvement in 2011 China Water Industry

Veolia Water

15: 45 Afternoon Tea Break

16: 15 China Opportunities Brought by the Market Evolvement

Beijing Capital Co.,Ltd

16: 45 How to Realize Ideal ROI in a Competitive Market?

Suez Environment

17: 15 Roundtable Discussion: How to be a Successful Market Player in 2012 China Water Industry?

Distinguished guests from:

Beijing Capital Co.,Ltd

Veolia Water

Suez Environment

Berlinwasser International AG

Beijing Enterprises Water Group Limited

Group Limited

Sound Group

18: 00 End of Day 1 Forum

Oct 13th---14th, 2011
Beijing International Convention Center

Day 2 Morning, Oct 14th

Financing & Investment

9: 00 Illustrating Financing Issues in Water Industry

China Securities

Regulatory Commission

9: 30 Finance Issues in Water PPP Project Management & Operation

Thames Water

10: 00 Morning Tea Break

10: 30 Illustrating Financing Issues in Water Infrastructure Construction

Reserved for presentation sponsorship from world top EPC enterprise

11: 00 Key Factors of Successful Investment in Second and Third-tier Cities

Beijing Enterprises Water

11: 30 Financing Issue in Water PPP Project

China Water

Investment Co.,Ltd

11: 50 Legal Issues Concerning PPP Project Operation

Reserved for presentation sponsorship from world top law firm

12: 10 Panel Discussion: How to Be Market Winner in M&A Case?

Distinguished guests from:

Veolia Water

Suez Environment

Beijing Capital Co.,Ltd

12: 30 Luncheon

The 6th China

International Water Business Summit

Day 2 Afternoon, Oct 14th

Technological Innovation & Case Study

14: 00 Promoting Waste Water Treatment and Water Reuse Trend

Ministry of Environment Protection, P.R.C

14: 30 Case Study: Technological Innovation in Sludge Disposal

Reserved for presentation sponsorship from world top water sludge solution provider

15: 00 Afternoon Tea Break

15: 30 The Utilization of Top Green Technology in Sludge Disposal

SIEMENS Siemens Water Technologies

16: 00 Operating Sludge Disposal System thus Turning to New Profit Growth

Berlinwasser International AG

16: 30 Case Study: Technological Breakthrough in Water Recycling and Reuse
Reserved for presentation sponsorship from world top water total solution provider

17: 00 Analyzing the Technological Breakthrough of Membrane in Water Desalination

Membrane Industry Association of China

17: 30 Open Discussion: How to Realize Ideal Desalination model?
